

NovoMAX

Drain maintenance and cleaner

Specifications:

Description	Granular Powder
Color	Brown
Fragrance	Neutral
Presentation	22 Lbs. (10 Kilos)
pH	6.0-8.5
Density	0.5 - 0.61g / cm3
Nutrient Content	Nutrientes y estimulantes biológicos, micro-alimentos y surfactantes.
Plate Count	1.5 billones / gramo

Novomax Drain maintenance and cleaner is specially designed for direct supplementation of drains and grease traps in restaurants, supermarkets, shopping centers, mining camp cafeterias, etc. Novomax contains microorganisms capable of degrading a wide range of vegetable oils and fats under aerobic, facultative, and anaerobic conditions, combined with natural biological enhancers, micronutrients, and macronutrients. When applied regularly, Novomax reduces grease accumulation in oil collectors, drains, and traps, breaking down fats and other solids that remain free in the system.

Storage
Do not freeze. Store in a cool, dry place. Do not inhale. Avoid contact with skin. Refer to MSDS.

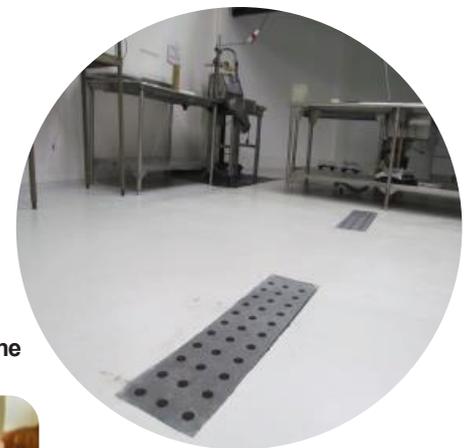

Application Instructions:

The application of Novomax Eco-drain must allow for a maximum retention time in the sewer.

For example, apply the product daily and at the end of the work shift.

Novomax Eco-drain is supplied in water-soluble packaging to be added directly into the drainage system or mixed with water.

- Kitchen: 25 g per day
- Laundry: 25 g per day
- Grease trap: 25 g per day

1. Use Novomax Eco-drain every night. It should be applied after finishing the work routine; it is recommended to have everything clean.
2. Dissolve two bags of Novomax Eco-drain in 3 liters of warm water between 26–32 °C. After a few minutes, most of the brown particles will sink to the bottom of the bucket, leaving the active ingredients suspended in the water. Please note that the particles will not dissolve when stirred.
3. Do not use hot water above 40 °C.
4. Pour a 1/2 liter solution of Novomax Eco-drain into each drain, sink, washbasin, shower, or floor drain.
5. Wash hands at the end of treatment.
6. If you miss one night, double the dosage the following day.

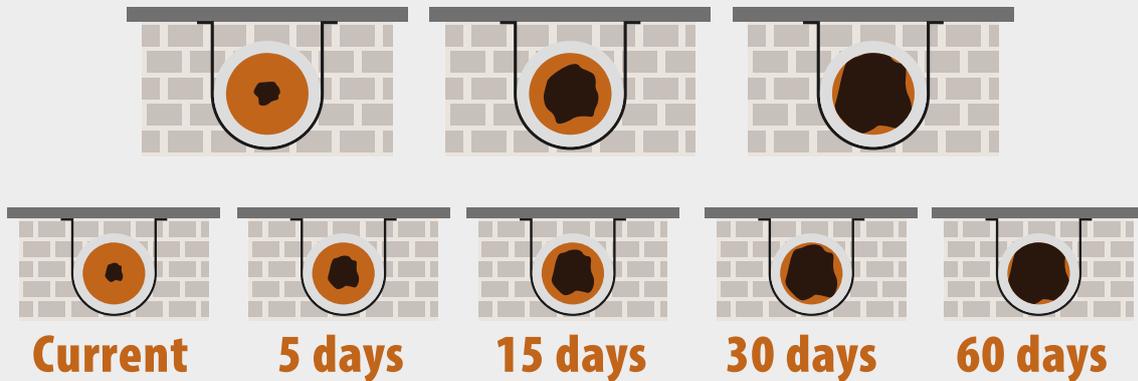

Benefits:

- Reduces odors.
- Keeps the drainage clean.
- Reduces grease buildup.
- Keeps the chamber line clean.
- Prevents clogging emergencies.
- Works by cleaning all types of pipes, kitchen drains, and bathroom drains.
